

Loraine - 9058L-H - Hip Chair

Specifications:

Our hip chairs are specifically designed with a higher seat to reduce stress on joints, require less bending when sitting or standing, and eliminate risks of falling when entering and exiting the chair. Created for function as well as style, our unique hip chair delivers an important option to a senior community. In addition, it provides subtle design elements such as the wood exposed, semi-upholstered arm, gently curved back, and center notch on front and back of the base. Engineered specifically with senior living comfort in mind, sitting, standing and relaxing are easily accomplished with ergonomic design and quality. Lumbar support, arm, seat height, pitch and depth assure healthy sitting posture.

Innovative Options:

Tilt by Samuelson is our solution to a common cleaning problem. Our discreet system allows the seat of our chairs to tilt forward, exposing a drop-through frame. We have thoughtfully engineered this hygienic system to facilitate a simple, single-step service
