Charlotte Curvaceous Hip Height Chair - 9219L-H

Specifications:

Created with sinuous clean lines and fluid architecture, this curvaceous hip height stool offers a balance of unique design and function. The open minimalist frame connects seamlessly throughout the structure, providing a sculptural silhouette. An interplay of arms, open back, legs and supportive stretchers speak to well- crafted elegance.

While the aesthetics are captivating, ergonomics are an equal priority in crafting this stool of timeless elegance. A flat, tailored seat cushion is attached to a visible low profile wooden saddle, keeping a slim profile. A wrapped, upholstered top rail is a distinctive design element. Comfort, structural support and thoughtfully designed pitch address correct posture and comfort. An organic profile is achieved as open frame of arms and back connect to splayed legs. Beauty and function are found in equal measure.
