

Albert - 9213L - Swivel Sound Chair

Specifications:

This swivel lounge chair offers exceptional aesthetics, comfort, and function. Fully upholstered, densely padded but firm enough to provide easy sit and stand with loose seat cushion, lumbar support, cozy wrap around arms and high back to cradle head and neck. Design detail of outside back gives architectural dimension as upholstered arms extend to a continuous shell-like enclosure. A recessed 360 swivel mechanism allows full range of movement.

Engineered specifically with senior living comfort in mind, sitting, standing and relaxing are easily accomplished with ergonomic design and quality. Lumbar support, arm, seat height, pitch and depth assure healthy sitting posture.

This chair incorporates Sound by Samuelson. Intense research and development have culminated our unique patented product, transforming our chairs into a fully capable Bluetooth speaker. Unlike typical gaming chairs, we do not use a commonly found directional firing speaker. Rather, we have turned the chair itself into the speaker for a fully immersive experience! *US Patented
