

Carla - 9100L-H - Hip Height Chair

Specifications:

Our hip chairs are specifically designed with a higher seat to reduce stress on joints, require less bending when sitting or standing, and eliminate risks of falling when entering and exiting the chair. Created for function as well as style, this unique hip chair delivers an important option to a senior community.

There is an elegance to this exquisite chair achieved through skilled artistry and innovation. The complexity of design elements include a seamless flowing frame integrating the front legs, arms, and back of the chair. An X stretcher connects gently tapered legs for stability. Curvaceous and organic from any angle, the addition of a rounded, upholstered inset back with a decorative, vertical supporting stretcher brings strength and durability. As a thoughtful design option, the upholstered back is offered with a cane inset for a light organic touch. A plush, tightly upholstered seat provides additional comfort to the perfect pitch of this dining or accent chair.
