

Immersion- 8844L - Smart Chair

Specifications:

A high back wing chair with brainpower! Features include LED lighting softly cast onto walnut base, (2) USB charging ports, uniquely transmitted blue tooth sound technology for individual private listening, and the comfort of beautifully detailed top stitched upholstery.

Engineered specifically with senior living comfort in mind, sitting, standing and relaxing are easily accomplished with ergonomic design and quality. Lumbar support, arm, seat height, pitch and depth assure healthy sitting posture.

This chair incorporates Sound by Samuelson. Intense research and development have culminated our unique patent pending product, transforming our chairs into a fully capable Bluetooth speaker. Unlike typical gaming chairs, we do not use a commonly found directional firing speaker. Rather, we have turned the chair itself into the speaker for a fully immersive experience! ***US Patented**
