

9164 - Happy Power Recliner

Specifications:

Meet our power recliner and put a smile on your face! We call our newest recliner “Happy” for good reason. Press a button and electronically recline with ease. Happy provides a positive user experience. While offering all the comfort and support one would expect from a quality recliner, its sleek and modern design exceeds preconceived expectations of a recliner chair. The entire back easily tilts for lumbar and headrest support as the foot rest easily extends for elevation.

The Happy not only feels like a warm hug, but it hugs the wall as well with our wall-hugger feature requiring only 6” of clearance to completely recline.

Engineered specifically with senior living comfort in mind, sitting, standing and relaxing are easily accomplished with ergonomic design and quality. Lumbar support, arm, seat height, pitch and depth assure healthy sitting posture.
